

Sample persona:

Name: Arjun Kumar Role: College Student Course: B.Tech IT (2nd Year) Tech Comfort: Medium	Goals: • Participate in club events easily • Apply for OD without confusion • Get quick approval updates
Quote: “I want to join events, but applying for OD is always confusing.”	Frustrations / Pain Points: • Multiple registration methods • Delayed OD approvals • Lack of clear event information

Empathy Map:

Journey Map (Student journey map for event registration)

Journey Map			
Stage	Student Actions	Thoughts & Emotions	Touchpoints
Application	- Check various registration links and apply. - Apply for OD through available links.	"I hope I applied correctly..."	- Event details from WhatsApp, Instagram, posters - Submit OD request to faculty or club admins
Waiting for Approval	Check for updates frequently.	"Did my OD get approved yet?"	Some time later, message or follow up to ask about approval
Event Day	Attend club event after OD is approved.	"Got it! I can join the event now."	WhatsApp messages, calls or manual OD slips from faculty/admins
After Event	Mark attendance after the event.	"I hope they marked me present..."	- Report attendance by signing OD form - Contact coordinator for confirmation
Follow-Up	Check for attendance confirmation.	"Did they record my attendance?"	- Get confirmation from faculty/admins - Update attendance with OD approval status

Problem Statement:

"In many colleges, event registrations and On-Duty (OD) approvals are managed through multiple disconnected methods such as Google Forms, WhatsApp, social media posts, and manual records. This creates several challenges where:

- A) Student participation records are inconsistent and difficult to track accurately
- B) Approval processes are delayed due to manual coordination between clubs and faculty
- C) Event information is scattered across platforms, causing confusion among students

This leads to inefficiencies where students struggle to get timely approvals and coordinators face increased administrative workload.

The core challenge is not merely managing event registrations but designing a system that improves transparency, simplifies coordination, and ensures accurate tracking of student participation in college events."
